

- ▶ Cable of removing the impurities adhering to cereals such as dust, sand grains or dirt, ready for cereal milling;
- ▶ Cable of reducing the quantity of microorganisms like bacteria and fungi to significantly improve the cereal sanitation;
- ▶ The beater is made of special material, with very high wear resistance, able to reduce the maintenance cost;
- ▶ The rotor is given a dynamic balance test to assure the running performance of equipment;
- ▶ Compact design for the convenience of upgrading in an existing mill.

FDMW WHEAT SCOURER

Designed for powerful surface cleaning of grains including preliminary cleaning and further cleaning operation of wheat grains.

TECHNICAL PARAMETER

FDMW Wheat Scourer

Model	Capacity(t/h)	Power(kW)	Dimension(L×W×Hmm)
FDMW30 × 60	2-4	5.5	1450 × 650 × 1350
FDMW40 × 100	4-7	7.5	2200 × 720 × 1750
FDMW40 × 150	7-10	11	2710 × 720 × 1750
FDMW40 × 150 × 2	14-20	2 × 11	2710 × 1200 × 1750
